

Introduction to Theraplay®

Theraplay® is a short-term, playful, engaging treatment that focuses on parent-child relationships and can help adoptive/foster children form secure attachments. This one-day workshop introduces the key elements of Theraplay®. The focus will be on practical strategies that can be taken away and used by parents in the home, and by professionals in their practice. A qualified Theraplay® trainer will be on hand to work with you.

This day is designed for anyone who would like to know more about Theraplay®, including those who make referrals and professionals considering adding Theraplay® to their practice. This may include adoptive parents and foster carers, psychologists and psychiatrists, social workers, counsellors, family therapists, play therapists, teachers, occupational therapists, speech and language therapists, adoption/post-adoption counsellors and medical professionals.

Facilitator: Theraplay® Institute

- Monday 14 June 2010 and Friday 25 March 2011
- 10am – 4.30pm
- North London

Benefits of attending

- Explore the effects of trauma and the role of play in building attachment
- Observe video examples of Theraplay® treatment
- Learn lots of playful interactions to use at home or in your practice
- Have lots of fun!
